Miguel Masó, PhD

miguel.maso@socotec.com +34 717 712 217
City: Barcelona (08006) Birth date: 9/4/1989 ORCID: 0000-0003-0962-8550

Employment history

2025 - today	**International Centre for Numerical Methods in Engineering (CIMNE)** Postdoctoral researcher
2022 - today	**Universitat Politècnica de Catalunya (UPC)** - Barcelona School of Civil Engineering Adjunct lecturer
2022 - 2025	**SOCOTEC Spain** - Buildings and cities Specialist Engineer, Head of development and innovation
2017 - 2022	**International Centre for Numerical Methods in Engineering (CIMNE)** Doctoral student with FPI grant

Education

2017 - 2022	**PhD in Civil Engineering** UPC, Barcelona, Spain
2013 - 2015	**Bachelor's degree in Philosophy and Theology** Ponitificia Universtià della Santa Croce, Rome, Italy
2007 - 2013	**Ingeniero de Caminos, Canales y Puertos** (1st and 2nd cycle studies) UPC, Barcelona, Spain

Languages

Native Spanish - Native Catalan - C1 English - B1 Italian

CV Summary

After studying civil engineering and a period studying philosophy and theology in Rome, he began a doctorate in civil engineering at CIMNE. During the initial years of his doctoral studies, he combined research with work for social purposes at the Montseny Foundation.

Durign the research period at CIMNE, he worked on the stabilization of finite elements for the hyperbolic differential equations, with focus on numerical implementation, multi-physics coupling, and multi-scale resolution. These developments have been succesfully applied to various projects. In addition to the finite element stabilization, he also researched on the particle finite element method, either with moving mesh and fixed mesh.

After a three-year stint in the structural engineering consultancy at SOCOTEC, he has returned to academia as a postdoctoral researcher.

Stays and other activities

Guest. Centro de Investigación en Matemáticas. Purpose: Research. Comparable tasks: WP3 of project TCAiNMaND-PIRSES-GA-2013-612607 Numerical Methods for Real Time Com-

putations Research on stabilized formulations the Finite Element Method applied to hyperbolic conservation laws. 18/07/2017 - 19/10/2017.

Teaching activities

2022 - today	**Structural Dynamics.** Credits: 7'5. Degree: Master's degree in Structural & Construction Engineering. UPC.
2022 - 2022	**Structural Analysis.** Credits: 7'5. Degree: Master's degree in Civil Engineering. UPC.
2017 - 2017	**Numerical Methods.** Credits: 6. Degree: Bachelor's degree in Materials Engineering. UPC.

Participation in R+D+i projects

(*2021 SGR 01349*) *Mecànica de Medis Continus i Estructures*
Financing entity: AGAUR. Agència de Gestió d'Ajuts Universitaris i de Recerca
From: 01/01/2022 To: 30/06/2025
PI: Cervera Ruiz, Luis Miguel

(*DPI2015-67857-R*) *Proyectos de I+D: Retos de la Sociedad 2015*
Financing entity: MINECO
From: 01/01/2016 To: 31/12/2018
PI: Codina, Ramon; Baiges, Joan

(*FP7- 612607*) *FP7-PEOPLE-2013-IRSES*
Financing entity: EC
From: 01/01/2014 To: 31/12/2017
PI: Larese de Tetto, Antonia

Miscellaneous

- **Skills:** Computational Mechanics, Fire Engineering, Ocean Engineering, Vibration Assessment
- **Programming:** C++, Python, Julia, C#, .NET, Git
- **Tools:** Robot Structural Analysis API, Revit API
- **Miscellaneous:** ENVISION SP 2023-2024
